شركــة الخليــج للمخـــازن
Gulf Warehousing Company

29th December 2013

To Whom It May Concern

Gulf Warehousing Company (GWC) is the largest logistics company in Qatar. With a staff of over 1100+ employees, GWC deals in warehousing, transportation, and supply chain and project logistics.

Realizing the need for securing its digital assets, GWC desired to conduct a Technology Risk Assessment activity which included Internal & External Penetration Testing, Security Configurations Review, Social Engineering, Denial of Service Testing, IP Telephony Testing and Security Assessment.

GWC selected DicoTech INFOGISTIC based on their prior experience in the Middle East region and local presence in Qatar. DicoTech Consultants conducted the internal and external penetration of the IT infrastructure including servers, Operating Systems and networks. The Web Application Penetration Testing was conducted using OWASP best practices. DicoTech Consultants also conducted the security assessment and reviewed the security policies and procedures and improved them under the guidelines of ISO 27001. DicoTech INFOGISTIC team also contributed towards the capability development of our Information Security team by conducting training boot camp on CISSP®.

DicoTech INFOGISTIC consultants possessed the technical knowledge, communication and project management capabilities to successfully complete this time critical assignment. The professionalism, understanding of our requirements and ability to propose solutions during this project was the hallmark of the DicoTech INFOGISTIC.

We look forward to working with DicoTech INFOGISTIC again and strongly recommend them.

Regards,

Maged Emil Kamal
